SAP Application Management Services

- SAP is delivering the new functionalities at a faster speed & demand for SAP applications is growing throughout the world
- Just implementing the SAP system is not enough, in order to achieve operational and strategic objectives, solutions must include the best possible features, timely support, continuous improvements & knowledge management
- It is very difficult for organizations to hire the employees who keep themselves upgraded with the latest trends (Be it in-house or through a partner)
- Since PraVik Technologies is formed out of passion, our team is self-motivated & always updated with the latest SAP features
- Our commitment to our customers – best possible features using standard best practices, timely support, continuous improvements & knowledge sharing sessions for end-users

Functional Support

- Configuring or improving new business features
- Setting up Plant rollouts
- Analysing & solving the issues faced by the business users
- Continuous knowledge transfers with business users
- Support during month-end/ year-end closing
- Functional support during SAP upgrades

Technical Support

- WRICEF functionality developments and enhancements
- 3rd party integrations
